In many cases, a grant funded project or period of work may be incremental to longer-term system change results or impacts, and it may be quite focused in terms of who is engaged. We do not expect the project to impact all aspects of our community.

How will this funding support your collaborative to make progress on your shared practice challenge? Please describe the primary outputs and/or outcomes that you expect to achieve through your grant funded activities, and how/if these will support you to make progress towards longer-term outcomes or impacts.
